

ANGO WORLD TAR & ASPHALT TRADING.LLC

COMPANY PROFILE

ABOUT US

ANGO WORLD TAR ASPHALT TRADING.LLC is a company based in Dubai - United Arab Emirates, with **Commercial License 1372735**, provides asphalt bitumen supply services, although it also supplies a variety of other petroleum products such as gasoline, diesel, kerosene and lubricants, its dedication to asphalt bitumen demonstrates a commitment to excellence in a specific niche resulting in an offer of highly specialized products and services adapted to the needs of the market.

We work on a contractual basis with the largest refineries, which allows us to not only offer competitive prices as well as supply a variety of types and grades of asphalt bitumen, adapted to the specific needs of each project.

In addition to supply, our partners offer technical assistance in the selection, transportation and application of asphalt, ensuring the quality and durability of paved surfaces. Actions that play a crucial role in road infrastructure and civil construction, thus contributing to the development and maintenance of roads, urban roads and other transport infrastructure.

OUR MISSION

Provide high-quality products and services that exceed our customers' expectations.

OUR VISION

To be recognized as a leading reference in the supply of asphalt bitumen and petroleum-derived products, standing out for its excellence, innovation and commitment to sustainability.

OUR VALUES

The values reflect our Commitment to excellence, integrity and responsibility in all our actions. Some of the company's core values can conclude:

Transparency: We maintain open and honest communication with all our stakeholders.

Quality: Commitment to delivering high-quality products and services that meet customer expectations

Integrity: acting honestly, transparently and ethically in all interactions and commercial transactions.

Innovation: We constantly seek new technologies and methods to improve our products and processes.

Sustainability: We adopt practices that minimize environmental impact and promote a greener future.

Customer Commitment: We prioritize exceptional service and customer satisfaction.

INSPECTIONS & CERTIFICATIONS TEST REPORT

ANGO WORLD TAR ASPHALT TRADING.LLC works with the largest merchandise inspection companies, we offer complete merchandise inspection and certification services to ensure product quality, product compliance, our inspection services cover all stages of the process from production to delivery and are carried out by experienced and qualified teams, we use internationally recognized inspection techniques and standards to ensure that products meet the necessary technical and regulatory requirements. Additionally, we provide documented certification of product quality and conformity, offering customers peace of mind that they are receiving high-quality, reliable products.

Specialized Packaging: We use packaging systems such as Drums, Big Special bags and containers, adapted for the safe storage and transport of bitumen.

To achieve this, we collaborate with companies such as SGS to carry out rigorous inspections before shipment, ensuring that all products meet international quality standards.

BUREAU
VERITAS

SHIPPING

The transportation and storage of our products are carried out with extreme precision and care to guarantee the integrity and quality of the materials until their final destination. **ANGO WORLD TAR ASPHALT TRADING.LLC** offers a series of customized solutions for transportation and storage, aligned with the specific needs of each client and project.

Efficient and Safe Transport: Our transport logistics are meticulously planned to ensure that merchandise is collected and delivered in a punctual and safe manner. We work with a reliable network of carriers and use rigorous practices to ensure products are handled correctly throughout their journey. We monitor each stage of transportation to avoid delays and damages, providing a smooth and efficient logistics experience for our customers.

PACKING SYSTEM

1

Drums: We use steel drums to store bitumen in liquid form. These drums are designed to withstand high temperatures and provide safe and efficient handling. The drums facilitate the transport and dumping of bitumen, maintaining its quality during storage and application.

2

Big Bags: For bitumen in solid or granular form, we use Big Bags, which are large capacity bags, made with resistant materials to guarantee the integrity of the product. The Big Bags are ideal for transporting and storing large volumes, allowing safe and efficient handling.

3

Special Containers: We use specialized containers to transport bitumen, adapted to store the product in a liquid or solid state, depending on the customer's specific needs. These containers are designed to prevent leaks, contamination and maintain the quality of bitumen during long distance transportation.

DRUMS

The drums used for the storage and transport of asphalt bitumen vary in capacity, meeting different needs and project scales. Here are descriptions of the typical dimensions of these drums, categorized by capacity in liters:

- **Small (30 to 40 Liters):** Height 50 to 60 cm, diameter 30 to 40 cm, weight 5 to 10 kg.
- **Intermediates (50 to 60 Liters):** Height 60 to 70 cm, diameter 35 to 45 cm, weight 7 to 12 kg.
- **Medium (100 to 120 Liters):** Height 80 to 90 cm, diameter 45 to 55 cm, weight 15 to 20 kg.
- **Large (150 to 160 Liters):** Height 90 to 100 cm, diameter 55 to 65 cm, weight 20 to 25 kg.
- **Very Large (180 to 200 Liters):** Height 100 to 120 cm, diameter 55 to 65 cm, weight 25 to 30 kg.

DEGREE OF PENETRATION

Asphalt bitumen is classified into different viscosity levels, each suitable for specific applications in paving and road construction.

- **Viscosity 35/50:** this bitumen has a low to intermediate viscosity, allowing for relatively easy and quick application.
- **Viscosity 50/70:** this bitumen has a medium viscosity, offering a balance between fluidity and resistance to flow.
- **Viscosity 60/70:** has an intermediate viscosity, slightly higher than 50/70, which provides greater resistance to deformation.
- **Viscosity 80/100:** This bitumen has the highest viscosity among those listed, being more rigid and less fluid.

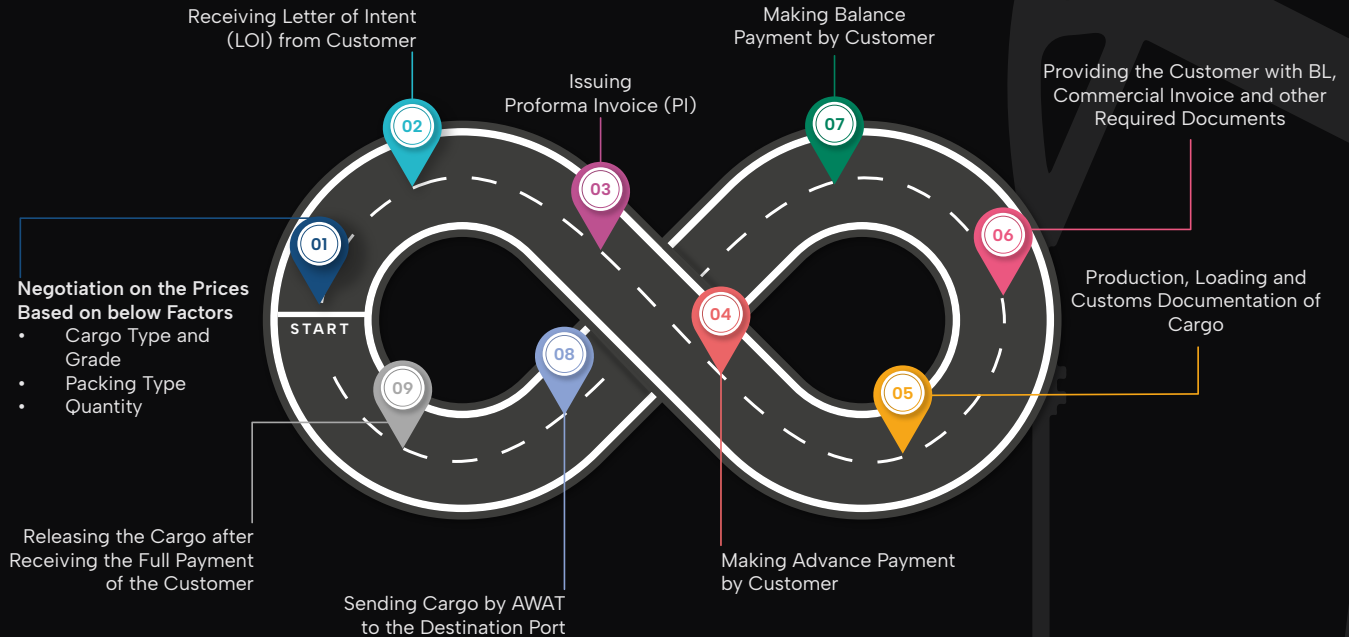

BIG BAGS

The **Big Bags** are widely used for the storage and transportation of asphalt bitumen due to their flexibility and large volume capacity. They are designed to maintain material integrity during transportation and storage, categorized by capacity in liters:

- **Big 500 Liter Bag:** Capacity of 500 liters, dimensions of 80 cm x 80 cm x 80 cm. Ideal for small projects or temporary storage.
- **Big 1000 Liter Bag:** Capacity of 1000 liters, dimensions of 100 cm x 100 cm x 100 cm. Perfect for medium-sized projects.
- **Big 1500 Liter Bag:** Capacity of 1500 liters, dimensions of 110 cm x 110 cm x 120 cm. Suitable for large paving projects.
- **Big 2000 Liter Bag:** Capacity of 2000 liters, dimensions of 120 cm x 120 cm x 150 cm. Ideal for large infrastructure works.

ANGO WORLD TAR
& ASPHALT TRADING,LLC

FUEL SUPPLY SERVICES

At **ANGO WORLD TAR ASPHALT TRADING.LLC**, we have full confidence that we offer a solid competitive advantage in fuel supply, thanks to our flexibility, agility, and extensive experience in logistics—essential qualities that our clients expect and value, converting our market intelligence into a real competitive advantage. Additionally, our strong relationships with producers and refineries worldwide enable us to work with fuel flows in both established markets and new demand regions.

TRANSPORT AND LOGISTICS

The transportation of fuels, from production sites to consumption regions, requires a robust and efficient supply chain that integrates maritime transport and secure storage. For AWAT, this operation is a priority and represents the core of our business, ensuring that our products reach their final destinations safely and efficiently.

Following transportation, our logistics operations ensure that fuels are stored and distributed strategically, maintaining quality and safety in all processes. AWAT has modern infrastructure and a state-of-the-art storage network with strategic points that enable rapid mobilization of products according to each client's demands.

Our logistics is managed by a specialized team that monitors every step—from storage to delivery planning—ensuring that our clients always have the fuel needed to sustain their operations without interruption. At AWAT, our commitment to logistical efficiency ensures that fuels arrive at the ideal time, with the quality and safety that is our trademark.

BUILDING RELIABLE AND EFFICIENT RELATIONSHIPS

We have a solid commitment to establishing and maintaining long-term, trustworthy business relationships throughout our supply chain. This focus on strategic partnerships enables us to serve our clients with the security and stability they expect. By working with reputable suppliers and partners, we ensure not only quality but also consistency and predictability in every delivery, especially for fuels and asphalt bitumen, essential products for paving and infrastructure.

PILLARS OF OUR BUSINESS PARTNERSHIPS

1

Long-Term Stability: Our partnerships are designed to last, bringing security and peace of mind to our end clients.

2

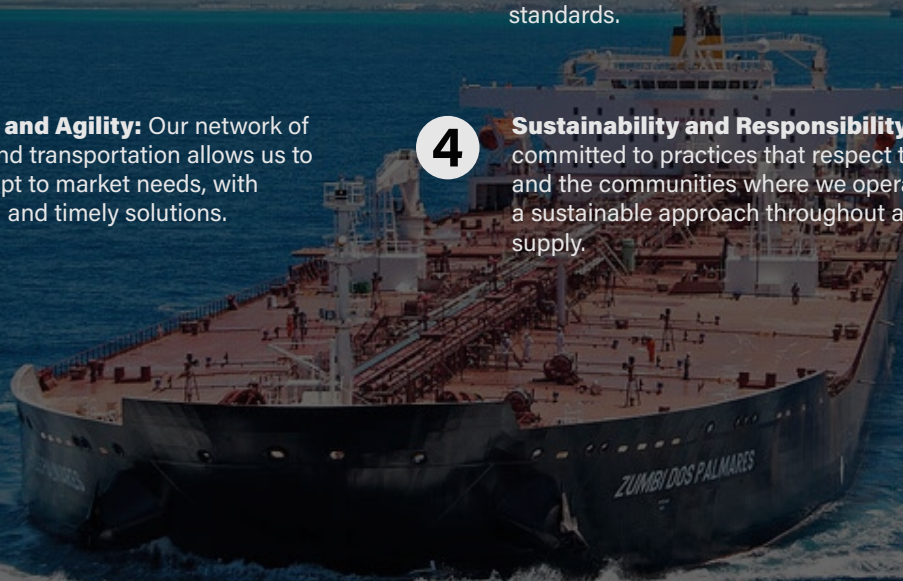

Flexibility and Agility: Our network of suppliers and transportation allows us to quickly adapt to market needs, with customized and timely solutions.

3

Quality and Reliability: We select suppliers who share our values of quality and responsibility, ensuring products that meet the highest international standards.

4

Sustainability and Responsibility: We are committed to practices that respect the environment and the communities where we operate, maintaining a sustainable approach throughout all stages of supply.

SUSTAINABLE BUSINESS STRATEGY

Economic Impact: Plays a key role in the global economy by providing essential energy resources, including fuels as well as asphalt bitumen. Our supply of bitumen and fuels directly supports transportation infrastructure and the operation of industrial vehicles and machinery—critical elements for industry functioning, the transportation of people and goods, and economic development on a global scale.

Environmental Sustainability: Committed to sustainable practices, AWAT adopts technologies and methods that prioritize energy efficiency and emissions reduction. In both fuel and asphalt bitumen supply, we continually seek to minimize our environmental impact, promoting responsible use of natural resources and contributing to a more sustainable future.

Commitment to Quality: Our approach is focused on offering paving and fuel solutions that provide durability, superior performance, and long-term economy. This commitment to quality is present in all stages of each project, from selecting the best materials to final execution, ensuring that our clients receive solutions that meet the highest industry standards

FINAL CONSIDERATIONS

A **ANGO WORLD TAR ASPHALT TRADING.LLC** is more than a supplier of asphalt bitumen and petroleum products. We are reliable partners, committed to providing solutions that not only meet, but exceed our customers' expectations. Our dedication to excellence, transparency and innovation is key to our success and the success of our clients' projects.

Our goal is to be recognized as the leading choice for high-quality paving solutions, offering products and services that drive the success of our customers' projects. We commit to contributing significantly to the development of durable and sustainable road infrastructure around the world.

Thank you for your time and trust. We are ready to collaborate with you and provide the best solutions for your projects.

THANKS.
